

Fulton County Schools Press Release

RE: School Report Card

Date: October 14, 2020

From: Dianne Owen, District Assessment Coordinator

On October 14, 2020, the Kentucky Department of Education will release the annual School Report Card for the 2019-2020 school year. This year's School Report Cards will be limited in updates due to COVID 19 and the suspension of statewide K-PREP testing last year. The statewide ACT scores for 2019-2020 will not be reported yet due to ACT make up dates not being complete until October 20th of this year. The state ACT reporting will be updated at a later date. New data that will be included will be last year's graduation rate data; English Learners Access data; long term goals and measures of interim progress; and trends which include state goals and actual performance trends as well as updated enrollment, attendance, and other non-academic data. At the present time all three schools are at the state goal for the schools. Trends and goals can be viewed as a graph under state goal performances. Safe school data is available but the climate survey data is not available due to not being able to survey every student. The school report card for Fulton County can be accessed through <https://www.kyschoolreportcard.com/home?year=2019> . Just put in the name of the district and you can access it from this site beginning on October 14, 2020.
